Solar Service Definitions

Developer – A company that secures financing for solar installations, often owning the result, and may or may not build the project, sometimes contracting with local EPCs.

EPC – Responsible for the engineering, procurement and construction of solar projects. Often the primary contractor and will sometimes appoint subcontractors to do construction or electrical work.

Rooftop Contractor – A solar installer that works primarily on rooftop installations.

Electrical Subcontractor – A company that performs specialized work related to the installation of electrical systems, often under contract with the developer or EPC.

Construction Firm – A company that often works under a developer or EPC on a specific aspect of a solar array, such as pile driving or building solar structures.

Solar Hot Water Installer – A company primarily involved with solar hot water installations.
